## OVERVIEW

**Line-Breeding:** Secretariat and Sir Gaylord are half-siblings both out of Something Royal out of Imperatrice. Something Royal and Prince John are both sired by Princequillo (going back to Tracery).

**Pattern:** Secretariat and Sir Gaylord form an inside-out pattern. Miss Winver shows a top-bottom pattern to Princequillo that is overall gender-balanced line-bred. Winver shows a perfect top-bottom pattern to St Germans.

**Special Features:** Winver and Mr Prospector are kin-breds. They share some common key ancestors like Johnstown and Case Ace. Johnstown is the broodmare sire of To Market (Dash For Cash – QH) and Nashua (Mr Prospector – TB). Case Ace is the broodmare sire of Raise A Native. Dash For Cash – QH was one of the most influential Quarter Horse stallion in the QH racing industry. He combined Johnstown and Imperatrice on the dam side.

## BREEDING OPTIONS

### STALLION REQUIREMENTS:

- Short backed and overall good conformation.
- Within 250 km of Chesley, ON.
- Stud Fee below 2500 CAD
- A descendent of Mr Prospector would generate a top-bottom pattern to Winver.

As this mare has a Dosage Profile of 4-10-18-4-0 with a Dosage Index of 1.77 and Center of Distribution of +0.39, the stallion would ideally improve towards more speed. The mare is well-built but on the smaller and more lazy side.

I have chosen [Where's The Ring](#) from Colebrook Farms for Valbella. The resulting foal, a bay filly born in 2020, shows the following pedigree features:

- Top-bottom pattern to Mr Prospector genetics.
- Where's The Ring top runners show an inside-out pattern to Nearco. This filly is bred on an inside-out pattern to Nearco, Mahmoud and Lalun (Strike A Pose x Sadlers Wells).
- Nasrullah (Bold Ruler) is emphasized through three sources in Where's The Ring; the repetition of Bold Ruler genetics in Secretariat's offspring was among the most successful. Sir Gaylords best offspring shows a duplication of Plucky Liege and Where's The Ring adds this mare four times (Bull Dog and his full brother Sir Gallahad). Valbella is kin-bred to Medaglia D'Oro; looking at his top runners, Where's The Ring is an excellent choice for Valbella.
- Dosage Profile 7-4-13-2-0 with a Dosage Index of 2.06 and a Center of Distribution of +0.62.

This filly's pedigree is improved across the board and shows now excellent patterns! This mating has also shown in kin-bred horses to work out! At least on paper she shows a higher aptitude for speed. She is still on the quieter side but doesn't miss an opportunity to play and run with her pasture mates. Pedigree of Where's The Ring x Valbella:
